

ACADEMIC POLICIES

Academic policies and procedures give students the ability to clearly understand their rights and responsibilities in regards to their education. They also protect the integrity of the degrees offered by the University and provide fair and transparent guidelines for activities related to teaching and learning across campus.

Not all policies and procedures apply to all programs. Students are expected to familiarize themselves with all academic policies in their area of study. Questions regarding the academic policies in the catalog should be directed to the appropriate office.
